-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3764

Claims 5, 9, 10, 11, 12, 15, 18 and 20-23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 6, 7, 16-19, 24 and 25 are rejected under 35 U.S.C. 102(b) as being anticipated by Nissen 3339925.

Nissen discloses a device comprising at least one rebound surface, flexible material extending vertically upward from said surface, an opening, a rebound surface mounting frame, a flexible material mounting frame and coupling members (60).

In regard to claim 6 –7 note elements 16 and 52 which can be interpreted as being a portion of the flexible frame assembly.

In regard to claims 16-19 note the four surfaces 14, 22 and 49 of Nissen wherein the flexible material (59) divides the at least one rebounding surface into four surfaces which will broadly be considered as play areas.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 7, 8, 13, 14 rejected under 35 U.S.C. 103(a) as being unpatentable over Nissen (3201126) in view of Laseman et al 4483531.

Nissen discloses the device of claims 1, 7 and 8 substantially as claim absent the teaching of his device including cross members which are padded and coupling members interconnecting his frame members and allowing movement of the frame in relation to a second frame.

As to the device including coupling members the examiner notes that it is well known in the art and that it would have been obvious to one of ordinary skill in the art to provide coupling members between the frame members 12 of Nissen for the purpose of securely attaching the frame members together.

As to the device including padding the examiner notes that it is well known to include padding on any and all cross members of an exercising device wherein it is desirable to shield a user against undue hard contact with rigid portions of a device.

In regard to claims 2-4 the examiner notes that it would have been obvious to one of ordinary skill in the art to include slidable sleeves, which are removable, secured to the rebound surface-mounting frame in view of the sleeve members (36) of Laseman et al.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Note the plurality of play chambers openings, tunnel, horizontal and vertical surfaces of showers.
